SUMMARY

AI Engineering graduate (2026) with three internships in machine learning and LLM automation. At Skywalker.tc, built a Python pipeline that generates SEO product content for Trendyol brand catalogs using the Trendyol Seller API and OpenAI API, with rule-based validation and human review. Works with Python, FastAPI, REST APIs, SQL, pandas, scikit-learn and PyTorch, and builds React/Next.js interfaces for AI tools.

SKILLS

Programming: Python, SQL, TypeScript, JavaScript
AI / Machine Learning: Large Language Models (LLM), Generative AI, Prompt Engineering, OpenAI API, RAG, FAISS, Sentence-Transformers, Hugging Face Transformers, PEFT/LoRA, PyTorch, PyTorch Geometric, Graph Neural Networks, scikit-learn
Backend: FastAPI, REST API, Node.js, Express
Data: pandas, NumPy, OpenPyXL, data preprocessing, data pipelines
Frontend: React, Next.js, Tailwind CSS
Tools: Git, GitHub, Docker, Render

EXPERIENCE

SEO Intern (LLM Automation) | Skywalker.tc | Jan 2026 – Jul 2026

- Built a Python pipeline that fetches product data from the Trendyol Seller API, normalizes it and generates SEO-optimized product descriptions with the OpenAI API for brand catalogs on Trendyol.
- Added rule-based validation (prohibited terms, length limits, exaggerated claims), retry and rate-limit handling, and Excel reports comparing original and AI-generated descriptions.
- Designed a human-approval step so no AI output was published without review, keeping content compliant with marketplace rules.
- Built the Next.js/React/TypeScript review interface for AI-generated product images in a 10-person team: side-by-side variants, zoom, approve/reject/regenerate actions and batch ZIP download.

AI Engineering Intern | İsTeknolojileri | Jan 2025 – May 2025

- Preprocessed datasets in Python and ran scikit-learn experiments for model training, testing and evaluation.

Machine Learning Engineering Intern | Mavinci | Jan 2024 – May 2024

- Prepared machine learning datasets with SQL (JOINs, filtering, aggregations) and cleaned and transformed data with pandas.

PROJECTS

Clinic AI Chatbot | Python, FastAPI, OpenAI API | github.com/Taykuth/ClinicChatBotAi

- Built a 24/7 Turkish-language customer-service chatbot for dental and aesthetic clinics with a FastAPI backend, OpenAI gpt-4o-mini and a lightweight web chat UI, deployable on Render.
- Answers questions on services, prices and hours from a clinic profile, keeps multi-turn context, avoids medical diagnosis and routes appointment requests to the clinic's WhatsApp line.

NeoBioAI: Drug–Target Binding Affinity Prediction | PyTorch Geometric, FastAPI, Next.js | github.com/Taykuth/NeoBioAI

- Trained a 4-layer GINEConv graph neural network on 2,000 PDBBind protein–ligand complexes (test RMSE 1.56, Pearson r 0.63).
- Served the model through a FastAPI REST API with batch CSV prediction and a Next.js interface.

EDUCATION

B.Sc. in Artificial Intelligence Engineering | OSTİM Technical University, Ankara | 2022 – 2026

CERTIFICATIONS

Google AI Essentials | BTK Academy – Machine Learning | Hugging Face – NLP Course

LANGUAGES

Turkish (Native), English (B2, certified)
